ABOUT

Senior UX Designer with 13+ years' experience specialising in AI-driven applications, complex data flows and dashboards across SaaS and affiliate marketing. Strong background in UI design, prototyping and reporting. A proven track record of measurable business impact including a 90% workflow reduction and ~\$10M in annual customer time savings on a recent AI-driven product launch.

EMPLOYMENT HISTORY

Sr. UX Designer at Rakuten Advertising

Apr 2024 – Present

- Led design on an AI-driven reporting app with natural language search for 1,000+ advertisers, delivering a 90% reduction in report creation time, saving est. ~\$10M in annual customer time saving.
- Devised a multi-touch attribution system tracking 15 interaction touchpoints for affiliate users, adopted as a key client pitch differentiator.
- Influenced design projects for new features across multiple affiliate marketing applications.

UX Designer at Rakuten Advertising

Feb 2020 – Apr 2024

- Guided design on affiliate dashboard feature updates across responsive web, owning the full process from research and wireframing through prototyping and engineering handoff.
- Constructed components for the Blueprints design system, unifying patterns across 3 products by auditing inconsistencies and partnering with engineering on implementation.
- Conducted user testing sessions on report redesigns, identifying critical usability issues addressed pre-launch by moderating sessions, synthesising findings, and presenting recommendations to product and engineering.

Jr. UX Designer at Rakuten Advertising

Jul 2018 – Feb 2020

- Delivered wireframes, prototypes, and visual design across affiliate marketing applications while building foundational skills in interaction design and accessibility.
